

Anyone can be at risk
for hepatitis B.

Are you

Protected from
Liver Cancer?

The hepatitis B vaccine is the first vaccine babies receive but most adults born before 1991 were never vaccinated.

Vaccination is the best way to protect yourself and your loved ones from liver cancer.

The hepatitis B vaccine is:

-  Safe
-  Effective
-  Free*

*Most health insurance plans cover hepatitis B vaccination at no cost. If you are uninsured, call your local health department to learn where to access the vaccine for free or at a reduced cost.

Ask your doctor about protecting yourself against hepatitis B today.
